

SIMRAN BANSAL

Revenue Operations · Finance Systems · Operator + Builder

Bangalore, India | +91 7015933296 | simranbansal1301@gmail.com

[LinkedIn](#) · [Portfolio](#)

Revenue Operations lead with 4+ years running the messy middle of B2B finance — reconciliation, AR, collections, O2C, and the ERP transformations that make them scale. Currently building **The Credix**, an AI-driven revenue governance system that turns the manual work I used to lead into infrastructure. Comfortable in the details of a \$60M AR portfolio and in a product spec — and increasingly, both at the same time.

Focus: Product Building · Product Lifecycle · Revenue Operations · Order-to-Cash · Payment & Bank Reconciliation · AR Governance · SaaS Revenue Accounting (ASC 606) · ERP Implementation · Process Automation · Financial Controls (SOX 302/404) · Cross-functional Operations

BUILDING & EXPLORING

The Credix — Revenue Governance:

Building an AR and revenue-governance product around process readiness, collections automation, trigger-based actions, and escalation workflows.

Context-Aware Screenshot Moodboard:

Exploring a product that saves screenshots together with their original source and context, turning scattered inspiration into an organized, searchable moodboard.

Shared-Stay Split Payments:

Investigating whether shared accommodation bookings have a meaningful payment problem when one person has to manage the payment for a group, and exploring split-payment possibilities.

EXPERIENCE

Reconciliation & Revenue Accounting Lead *BiteSpeed · SaaS, India* Dec 2025 – Present

- Lead the finance team owning month-end and quarter-end close for a fast-growing SaaS platform under US GAAP; delegate, review, and hold the delivery calendar.
- Own end-to-end payment reconciliation across Razorpay, UPI, and payment gateways — matched to bank statements, subledger-to-GL, AR aging, and deferred revenue schedules.
- Designed and rolled out a reconciliation governance framework with standardized templates and controls, moving the team from ad-hoc process to audit-ready operating rhythm.
- Built cash application workflows — payment-to-invoice matching, refund processing, settlement dispute resolution with payment partners.
- Run root-cause analysis on reconciliation breaks; surface systemic billing and gateway issues and ship fixes to prevent recurrence.
- Record ASC 606 revenue and deferred revenue journal entries; ensure GST & TDS compliance; present MIS and variance reports to leadership.

Head of Operations (Freelance) *WeLiveProperty · UK Real Estate* Jun 2025 – Nov 2025

- Ran financial and operational functions for a UK real estate firm — bank and vendor reconciliations, cash flow reporting, cross-functional coordination with legal and finance.
- Implemented reconciliation controls and process improvements that made reporting audit-defensible and operations easier to hand off.
- Brought structure to a small, growing operation without adding headcount or overhead.

Reconciliation & AR Lead *Toronto Great Lakes Express · Canada* Apr 2022 – May 2025

- Led reconciliation and AR operations across a CAD 60M portfolio spanning 4 entities and 250+ accounts reviewed weekly.
- Managed and mentored the reconciliation team; delivered 100% on-time close every month and quarter for three years running.
- Owned the JDE → NetSuite ERP migration end-to-end: GL mapping, reconciliation module setup, data validation, cutover — trained 50+ users to 100% adoption, delivered 10% under budget.

- Designed the reconciliation governance framework — templates, escalation protocols, sign-off procedures — adopted across all four entities.
- Cut outstanding reconciling items by 75% through root-cause work on discrepancies and intercompany mismatches.
- Owned SOX 302/404 compliance: ICFR narratives, control matrices, audit evidence packs.
- Automated reconciliation flows via Excel macros and NetSuite templates — 75% efficiency gain, meaningful reduction in manual effort.

Accounting Assistant *York University · Canada*

Oct 2021 – Mar 2022

- Owned bank and subledger-to-GL reconciliations in QuickBooks; cut cycle time 20% by streamlining the process.
- Prepared journal entries, reconciliation summaries, and variance analysis for monthly close review.
- Organized audit evidence packs for US GAAP compliance.

Financial Services Intern *ADG Accounting · India*

Dec 2020 – May 2021

- Ran client reconciliations and built financial models; identified an investment opportunity that improved portfolio returns by 10%.

PROJECTS *(Live on Portfolio)*

Corner Shelf — AI Learning Platform:

Designed an interactive AI learning concept focused on practical application, regular testing, personalized learning paths, and confidence in evaluating AI outputs.

FastLane — Vendor Management System:

Designed a vendor management workflow to improve visibility into onboarding status, ownership, bottlenecks, and follow-ups.

Paarth — Elder Care Platform:

Designed an elder-care marketplace concept to simplify the discovery and coordination of care services for families.

The Golden Hour — Emergency Response:

Reframed a gig-economy case around the emergency-response gap and designed a concept using distributed gig networks to support faster first response before qualified help arrives.

SYSTEMS & TOOLS

ERPs: NetSuite, JDE, Microsoft Dynamics GP, QuickBooks

Payments: Razorpay, UPI settlement workflows, gateway reconciliation

Analytics: Advanced Excel (macros, pivots, financial modeling), Power BI

AI / Product: Codex, Claude-code, Notion AI · currently studying AI Product Management

Frameworks: US GAAP, ASC 606, SOX 302/404, ICFR

EDUCATION

PGD in Financial Planning *Seneca College, Canada*

2022

Bachelor of Commerce (Integrated ACCA) *Chitkara University, India*

2021
